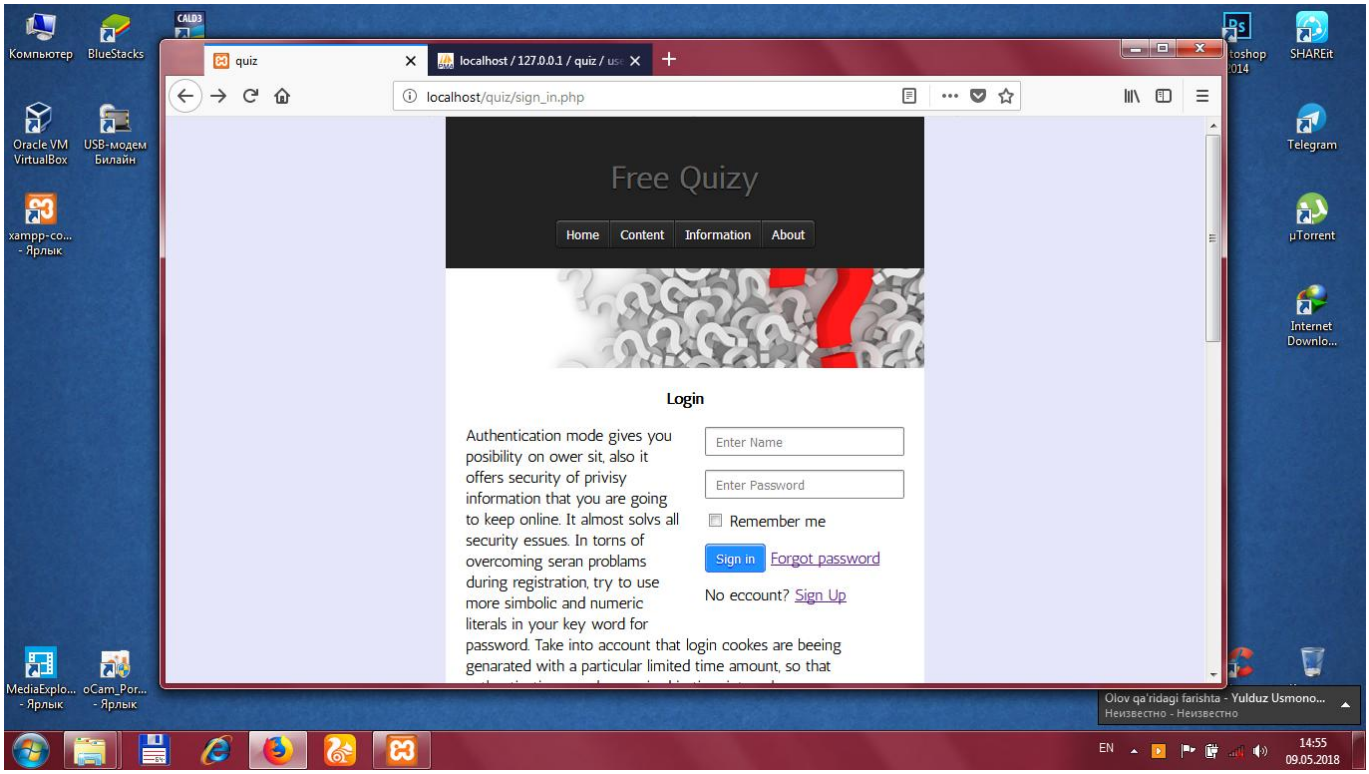
Free Quizy

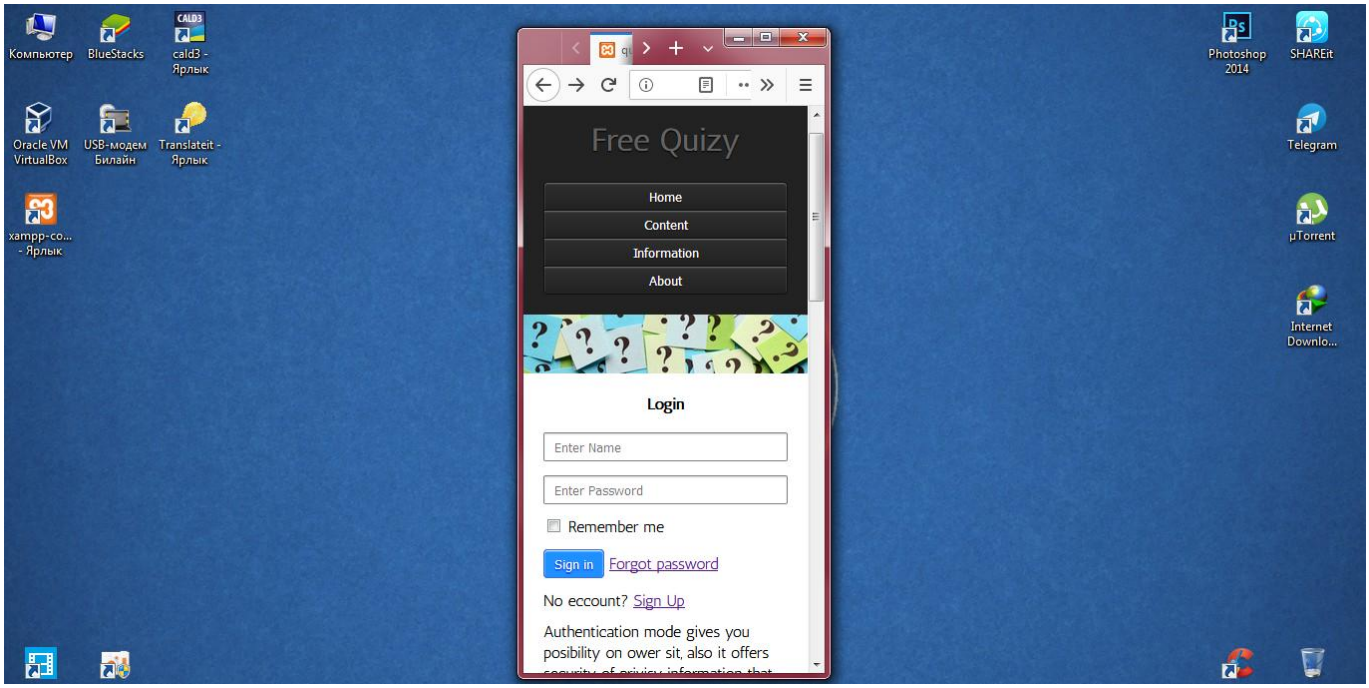
https://freequizy.000webhostapp.com
https://github.com/team-spg/freequizy.git

Company “Free Quizy” non-business activity is making quiz. Topic of quizzes can be any, scientific, medical, educational, general and etc. Quizzes are being made and uploaded by company workers with admin priority. Currently there are only four members in the company.

1. The first page that user see after buffering the site for the first time is sign in page.

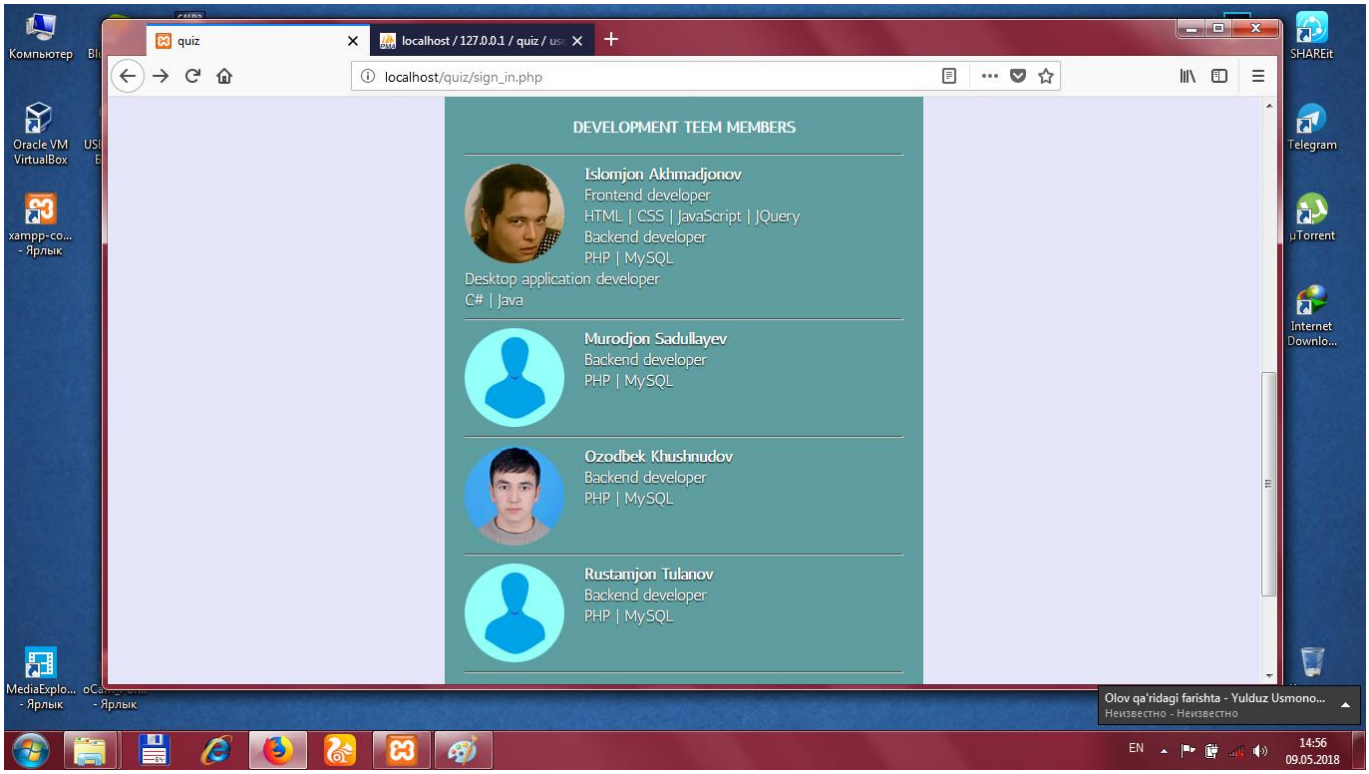


So in sign in page users are required to enter their name and password and not necessarily check “Remember me” in order not to fill up the field every time.

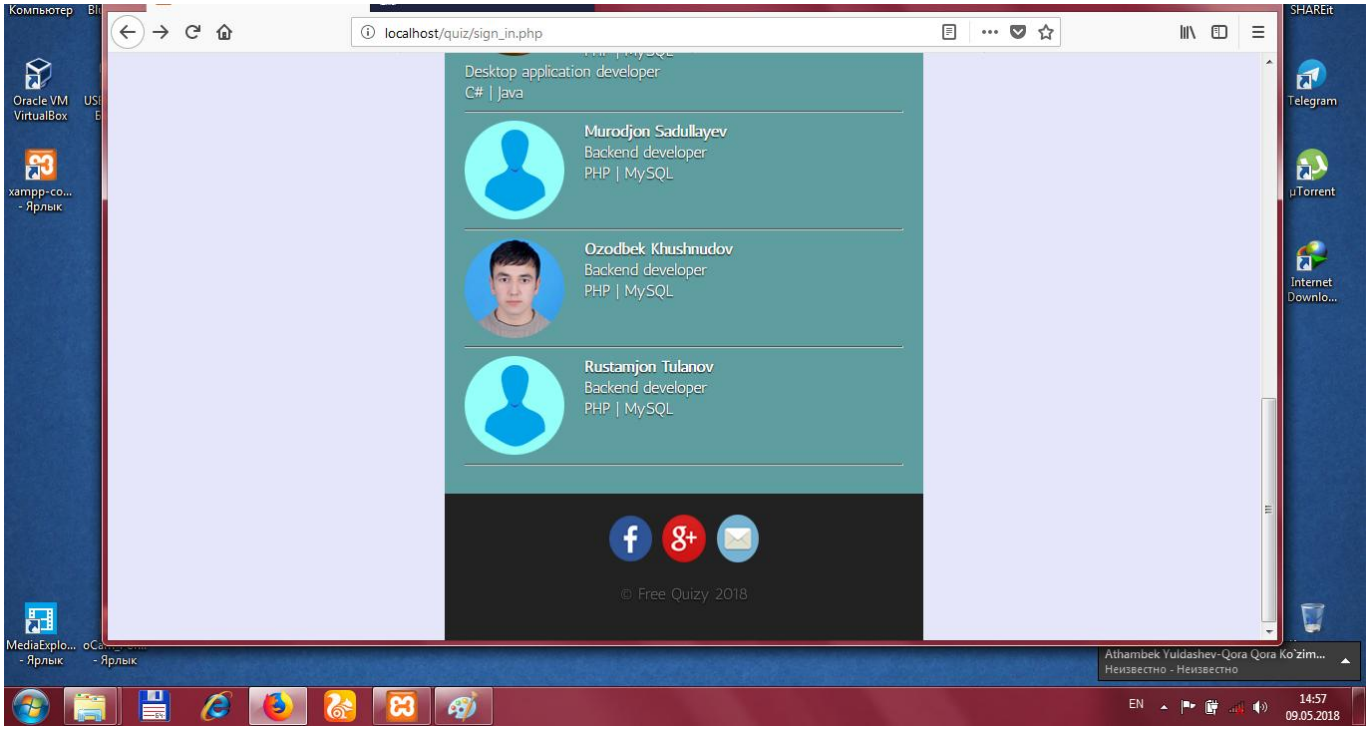


as it is visible that the site was created as mobile first application, and every page layout in it is responsible. It is done by taking to account the universality regardless of devise screen resolution for use.

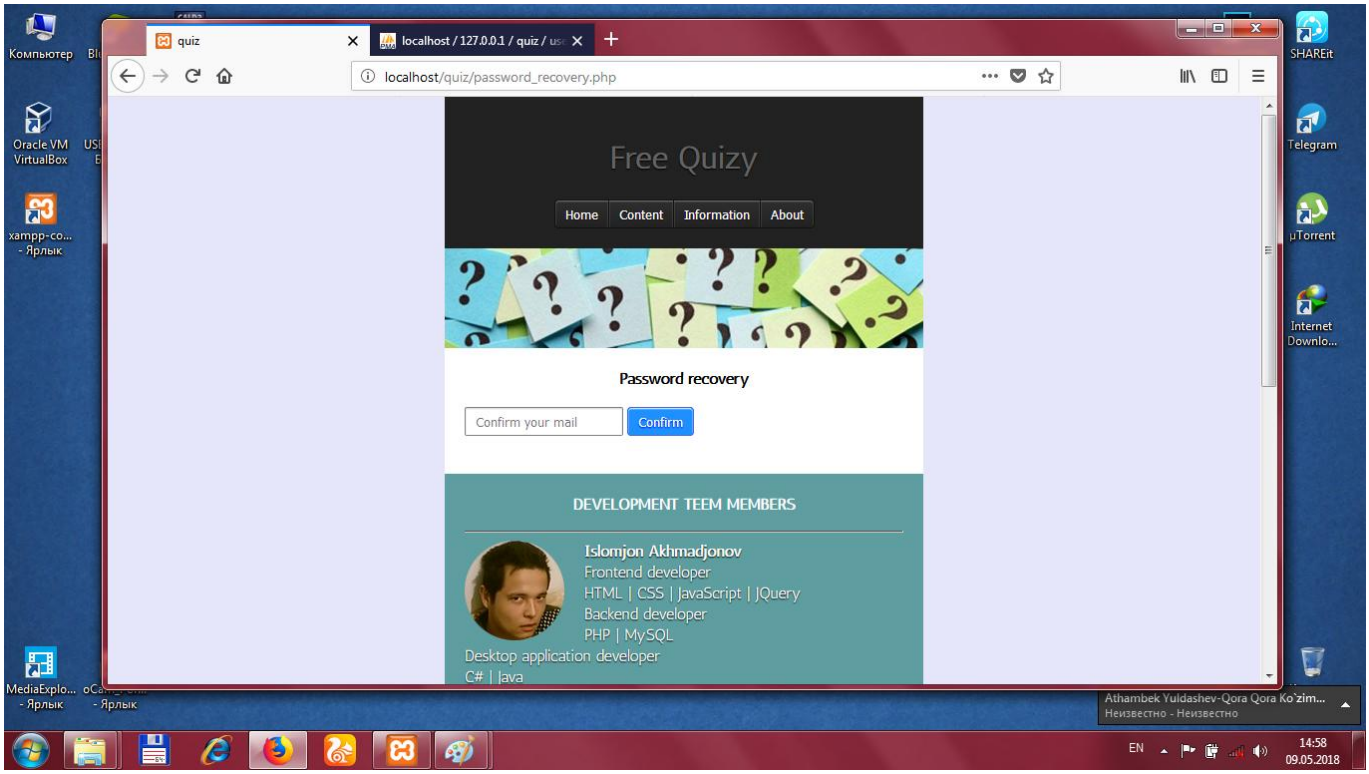
2. By moving down or by pressing about button from the navigation bur through the page there is development team members list which contain photo and the abilities description of each member.



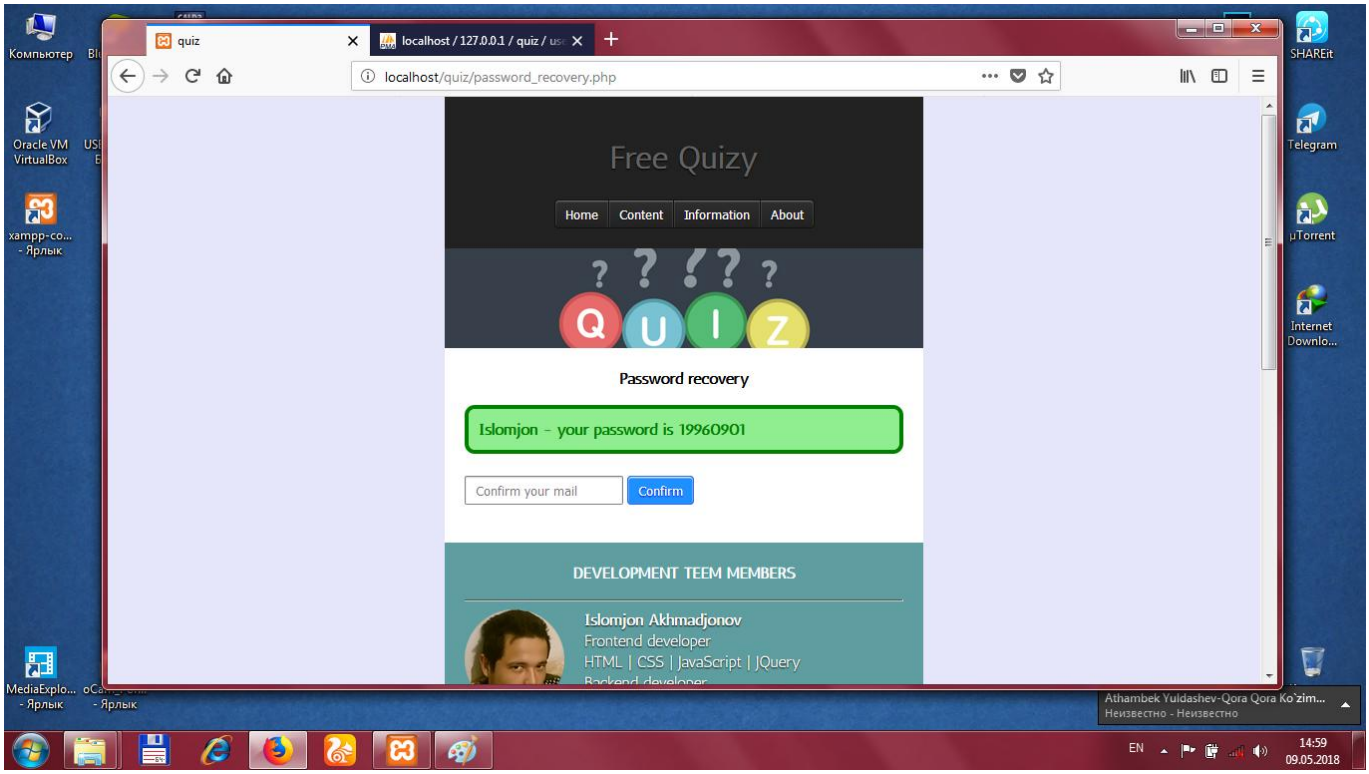
In the bottom of page there is a footer with contact link icons.



3. There more helpful features in for login

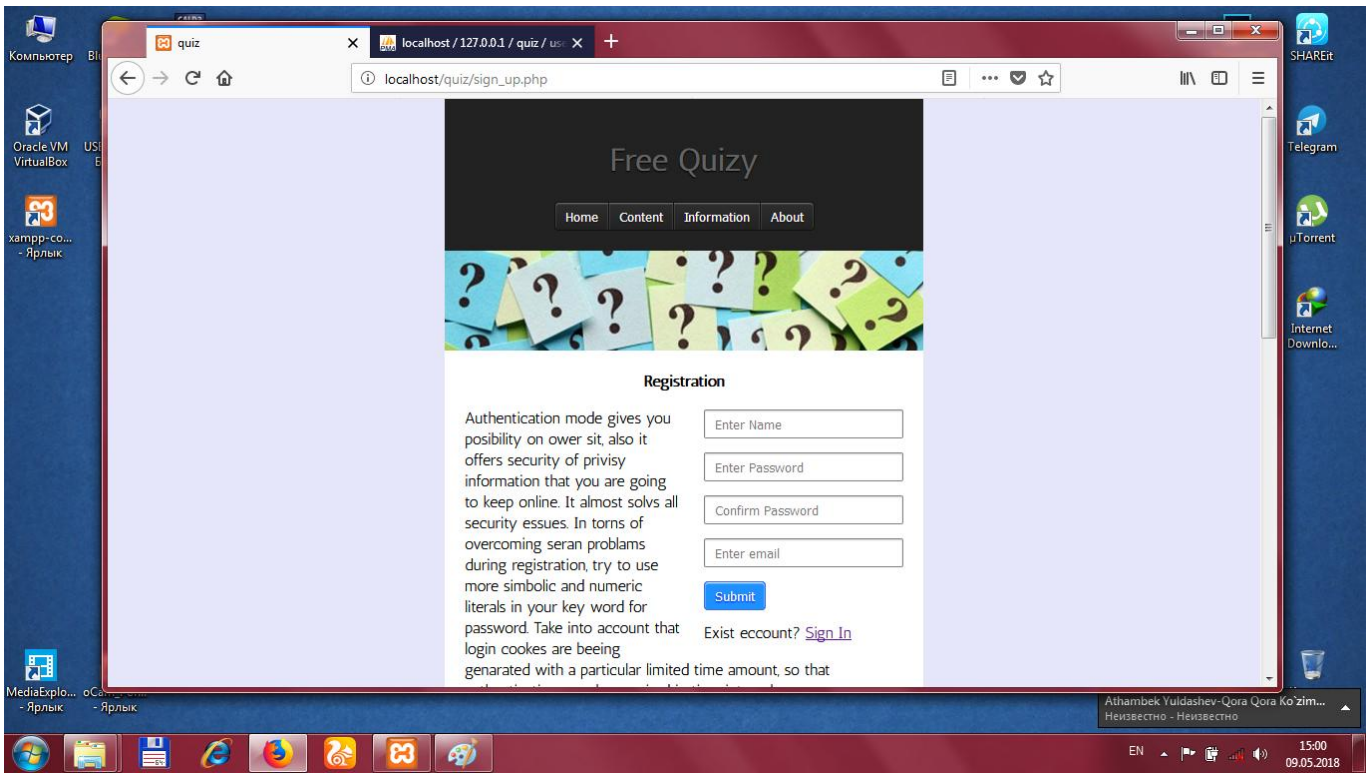


If the user unfortunately forget password the app offers possibility to recover the password, which requires only email of the registered user.

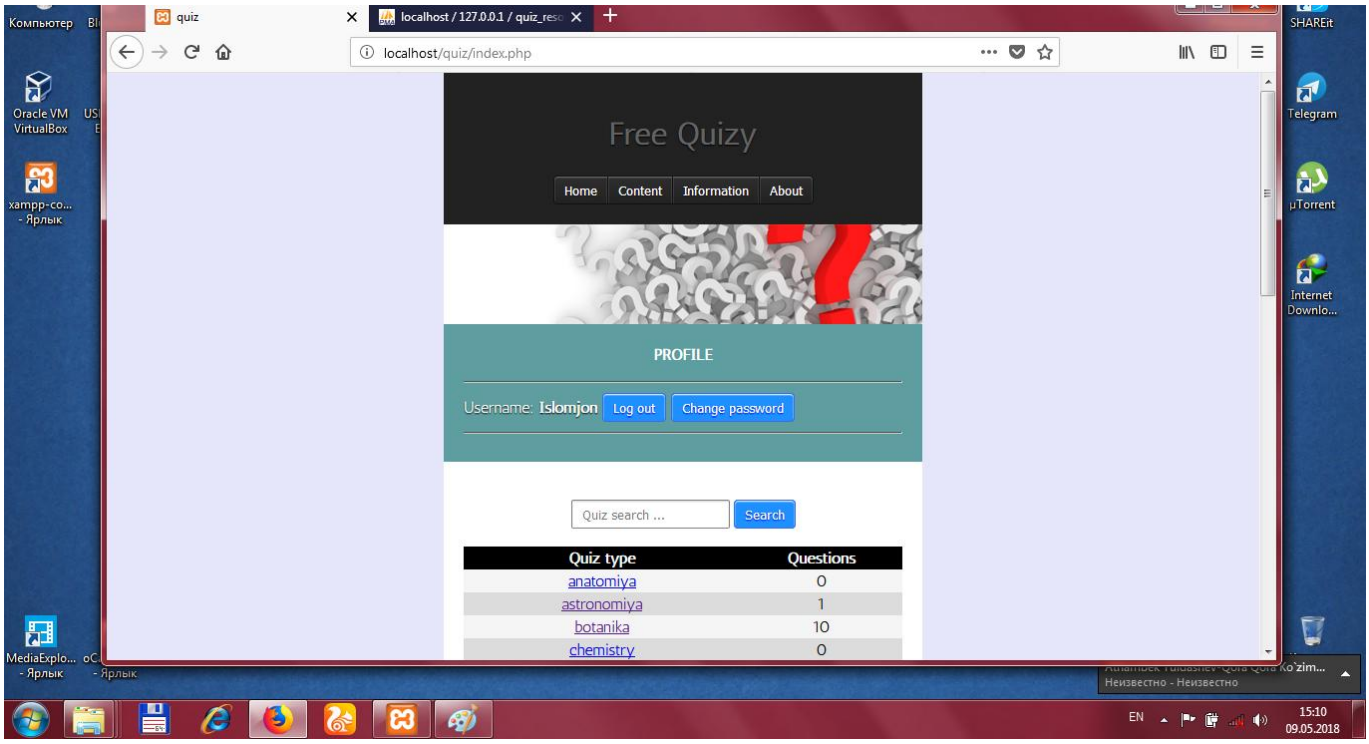


It even does not take long time and offer. As the email is confirmed users password will be recovered.

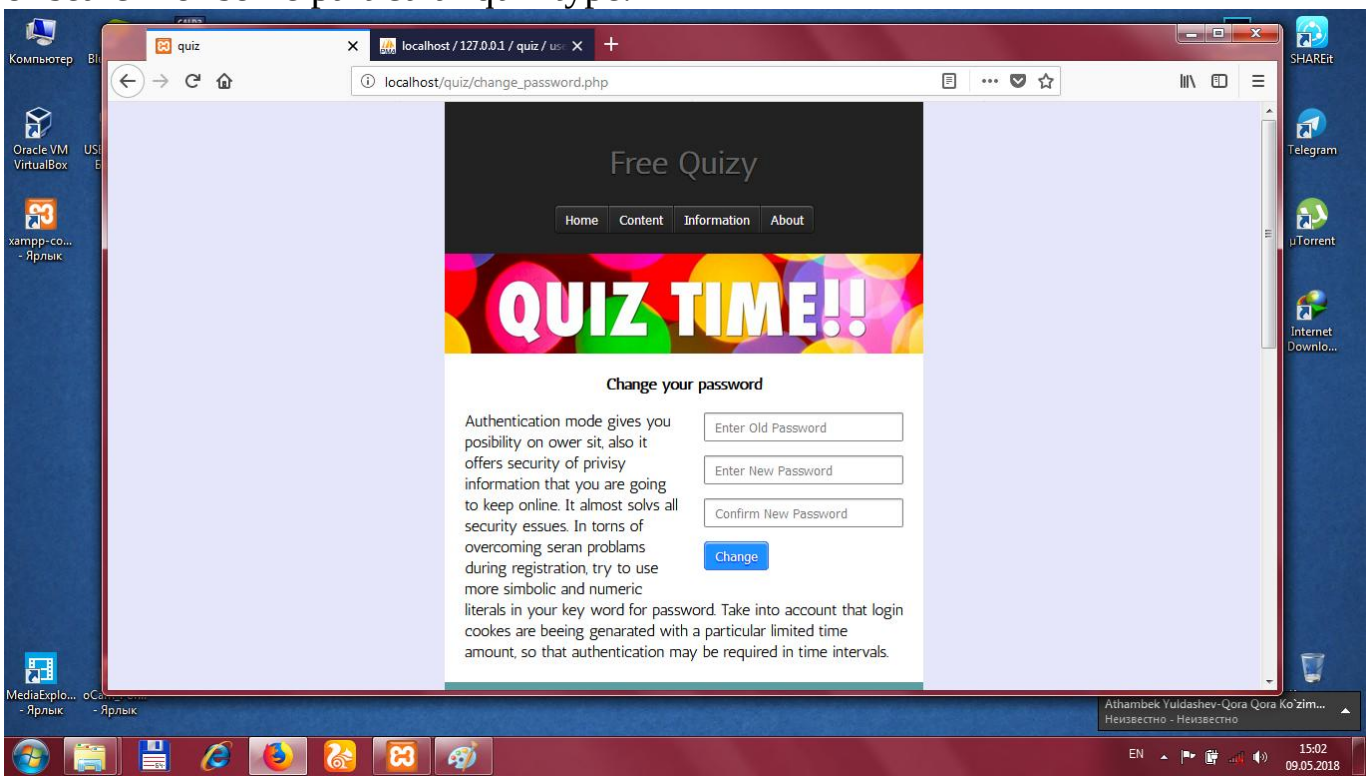
4. Only authorized users are able to use our services so for clients with no account can obtain one in sign up page.



Registration process is very easy. It demands for minimal amount of details and no personal information is required, which is the great thing.



as soon as registration process finished successfully the users immediately will be taken to their account profiles. There users can get into any quiz they want from list, or search for some particular quiz type.



Additional feature of profile navigation is ability to change password

5. Quizzes are all multiple question from two to four variants. Page navigator for getting input specific quiz question. For each quiz there is specific time is allocation depending on number questions in one quiz.

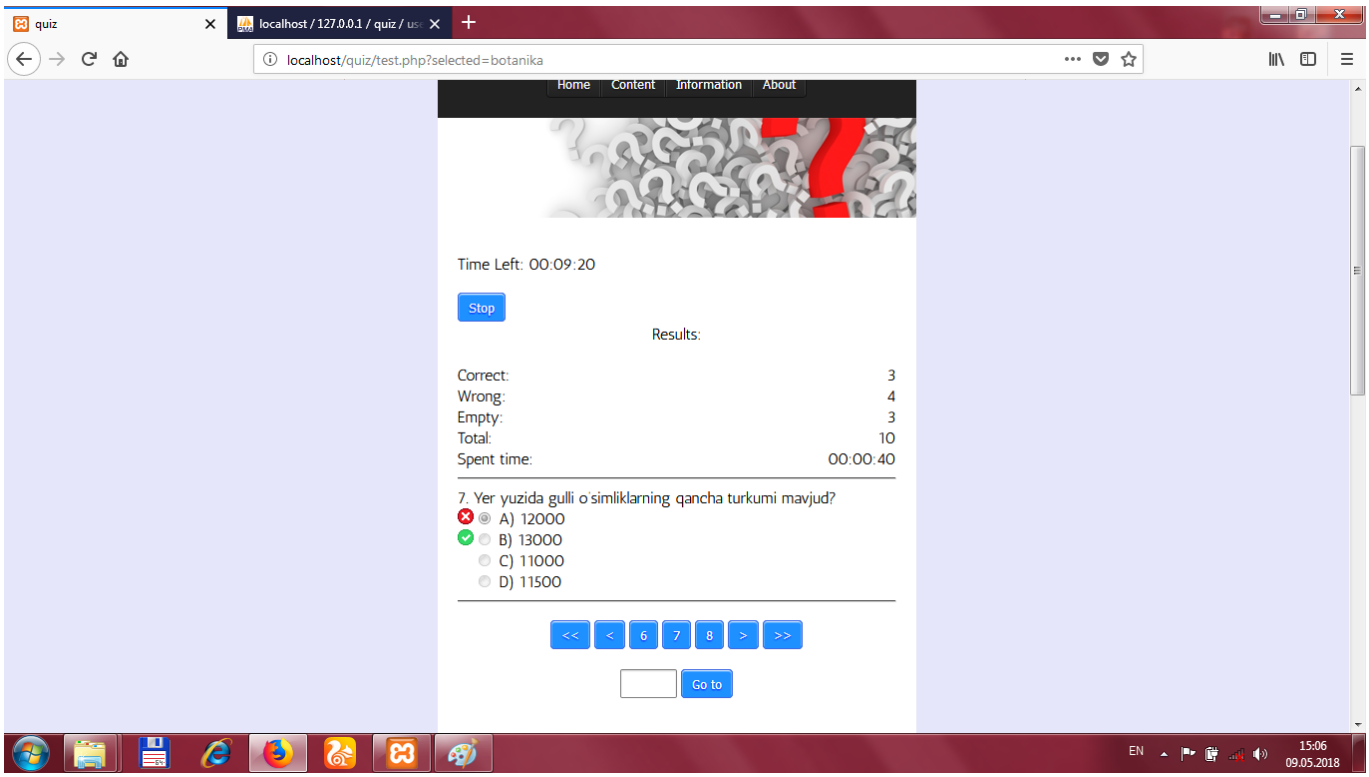
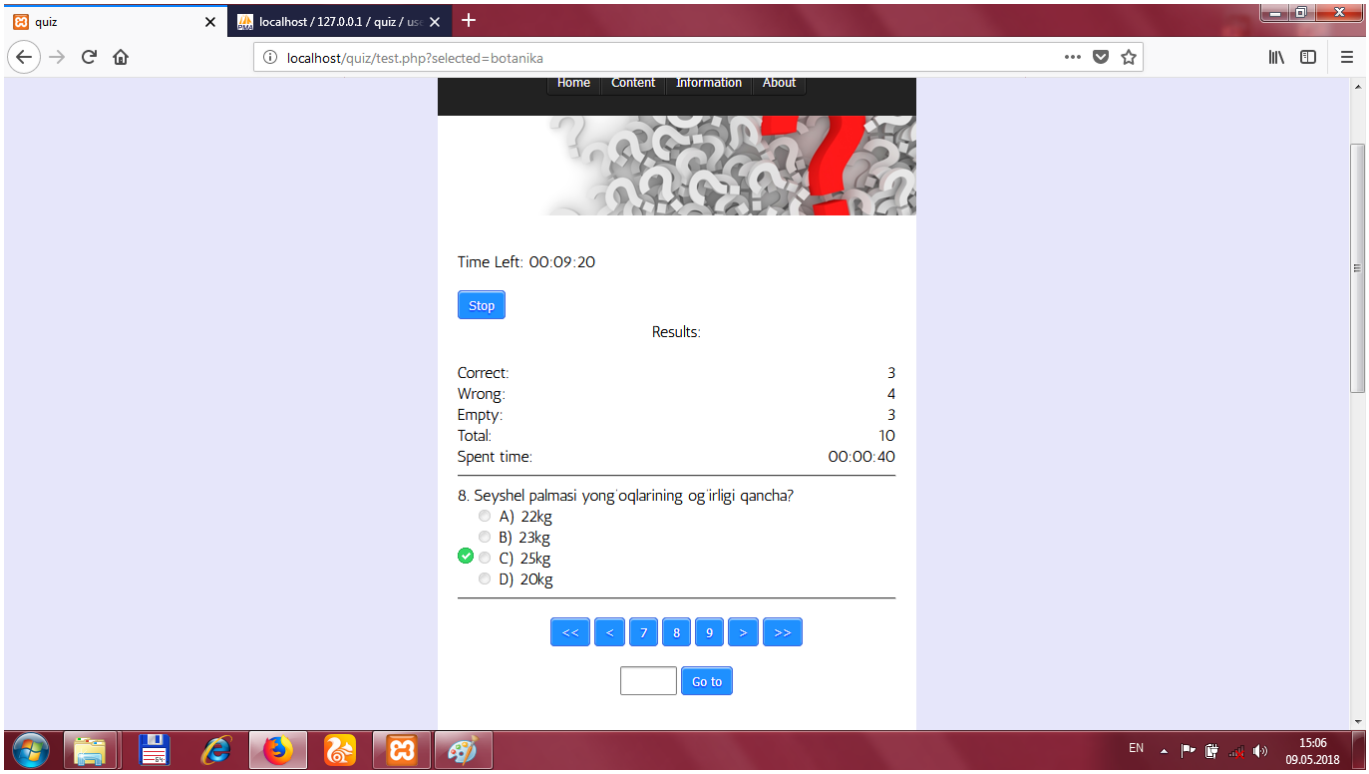
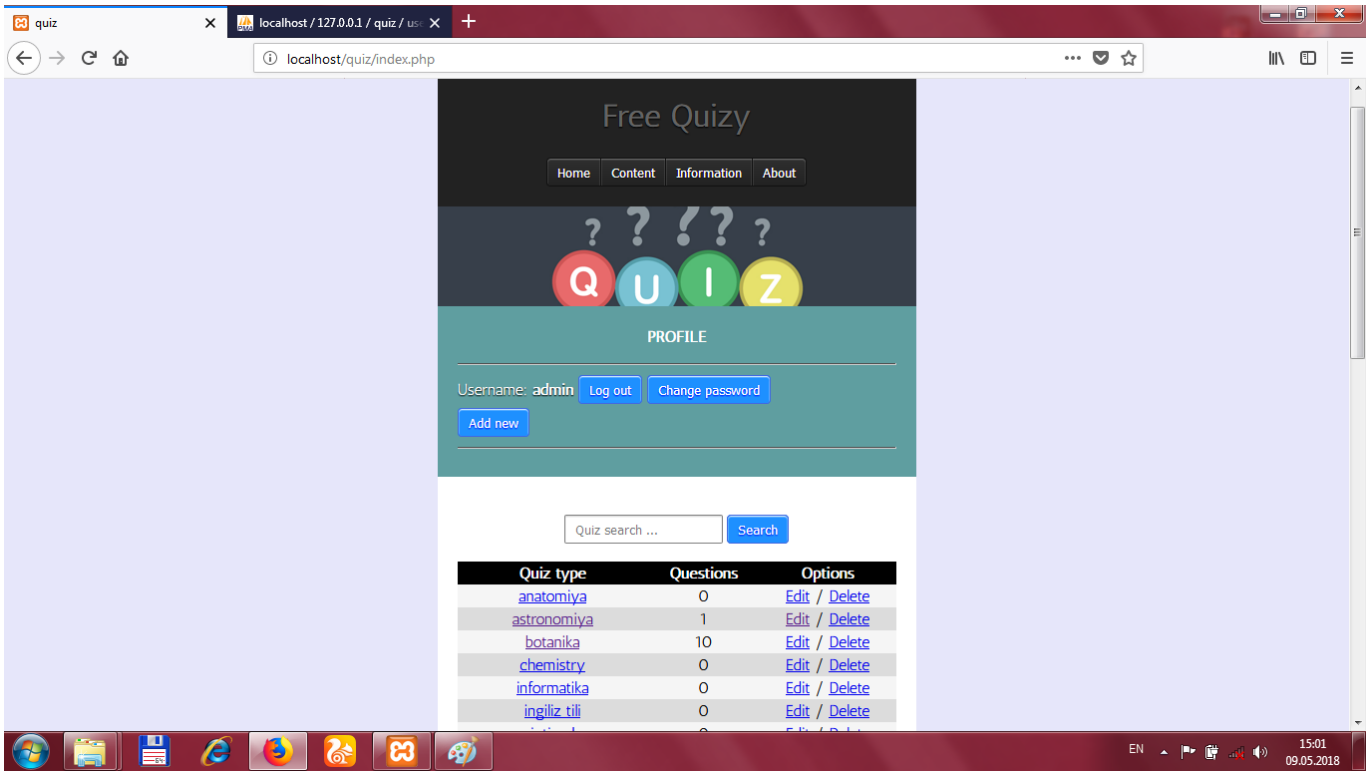
After given time for quiz finishes process stops automatically and the user can not more choose variants. The results will be illustrated in the same page and for analyzing the results all correct answers and wrong answers will be pointed out by highlighting. The same can happens if the user presses stop button if he or she finishes quiz earlier.





6. Need to mention that, as the admin user owns the high priority and it profile features has possibility of creating new quiz, editing the existing one or deleting.



If to press on the Information button from navigation bar on the header users will be directed to information page where they can get more familiar with technologies that are used to create this web application

Login
Authentication mode gives you posibility on ower sit, also it offers security of privisy information that you are going to keep online. It almost solvs all security essues. In torns of overcoming seran problams during registration, try to use more simbolic and numeric literals in your key word for password. Take into account that login cookes are beeing genarated with a particular limited time amount, so that authentication may be required in time intervals.
